

Vision

Posted in [Riding the wave](#) by [High Level Expert Group on Scientific Data of the European Commission](#)

“Researchers and practitioners from any discipline are able to find, access and process the data they need.”

“Producers of data benefit from opening it to broad access, and prefer to deposit their data with confidence in reliable repositories.”

“A framework of repositories is guided by international standards, to ensure they are trustworthy.”

Mission

Posted in [re3data.org blog](#) by [re3data.org team](#)

The goal of re3data.org is to create a global registry of research data repositories covering research data repositories from different academic disciplines.

The registry will present repositories for the permanent storage and access of data sets to researchers, funding bodies, publishers and scholarly institutions.

In the course of this mission re3data.org aims to promote a culture of sharing, increased access and better visibility of research data.

Tasks

Posted in [re3data.org blog](#) by [re3data.org team](#)

In the first phase of the project the following tasks are prioritized:

- the conception and construction of a web-based registry of research data repositories
- the definition of selection criteria of research data repositories
- the formulation of a metadata schema to describe research data repositories

According to the schedule the registry will go live in autumn 2012.

re3data.org is a project funded by the German Research Foundation DFG in the period 2012 to 2014.
